TECHNOLOGY

THE BOOK OF **BALANCE**

"In a world where purity meets every need, we find the essence of
true well-being."

**SUPRIYA WATER
TECHNOLOGY**

WELCOME

Supriya Water Technology is a leading company in the water industry, dedicated to providing top-notch services across various segments. With a commitment to excellence and customer satisfaction, we offer a wide range of services that cater to both residential and commercial needs. Our expertise extends to musical and non-musical water fountains, lighting and non-lighting solutions, and a comprehensive array of RO water purifiers. We understand that clean water is a necessity, and our commitment to water quality is unwavering.

In addition to our fountain and purifier services, Supriya Water Technology excels in maintaining the purity and sanitation of water tanks. Our 6th stage water tank cleaning services ensure that you have access to the safest water possible. We also provide media replacement services, ensuring that your water filtration systems remain efficient and effective. Our Annual Maintenance Contracts (AMC) cover Water Treatment Plants (WTP), Sewage Treatment Plants (STP), Effluent Treatment Plants (ETP), Filter Vessels, and more, giving you peace of mind in managing your water systems.

At Supriya Water Technology, we take pride in our ability to offer holistic solutions across multiple water-related sectors. Whether it's enhancing the aesthetic appeal of your space with stunning water features, maintaining the integrity of your water purification systems, or ensuring the cleanliness and efficiency of water storage, we are your trusted partner. Our dedication to quality, reliability, and customer satisfaction sets us apart in the water industry, making us the go-to choice for all your water service needs.

WHY FLAVIA CLASSIC RO?

Introducing the Flavia Classic RO Water Purifier - the epitome of advanced water purification technology! This state-of-the-art system boasts a powerful combination of Antioxidant Alkaline, RO, and UV technologies imported directly from the USA, ensuring your water is exceptionally clean and safe for consumption. With a remarkable purification capacity of 15 liters per hour, it's designed to meet the needs of even the busiest households.

Plus, the generous 12-liter water capacity means you'll always have an ample supply of pure, healthy water at your fingertips. Trust Flavia Classic to provide you with the ultimate in water purification, right in the comfort of your home. Say goodbye to water quality concerns with the Flavia Classic RO Water Purifier. Its innovative Antioxidant Alkaline, RO, and UV technologies from the USA combine to deliver the highest level of water purity.

This powerful system is capable of purifying an impressive 15 liters of water per hour, ensuring your family has access to safe and healthy drinking water whenever they need it. With a substantial 12-liter water storage capacity, the Flavia Classic is the perfect choice for those seeking a dependable and efficient water purification solution.

Experience the future of water purification with the Flavia Classic RO Water Purifier. This exceptional system incorporates Antioxidant Alkaline, RO, and UV technologies from the USA, guaranteeing water of the highest quality. With a rapid 15 liters per hour purification rate, it's ideal for busy households. Plus, the 12-liter water storage capacity ensures that you always have an ample supply of purified water readily available. Make the switch to Flavia Classic and enjoy the convenience of clean and safe water right in your own home.

SPECIFICATION

AVAILABLE IN:
RO+UV+ANTIOXIDANT+ACTIVATED CARBON
MEMBRANE+SEDIMENT FILTER+

APPLICATION TYPES: Suitable for Purification of Brackish/Tap/
Municipal water

EXTERNER PRE FILTER HOUSING SET

Purification Capacity : Up to 15 Liters Per Hour

Storage Capacity: 12 Liters.

Product Dimension(Inch): 21.1(H)x9.9(W)x16.7(L) with Top

DETOXIFIER FOR VEGETABLES & FRUITS

CONTROLLED TDS & PH WATER SUPPLY

PRODUCT CODE: FL31

INSTALLATION: WALL MOUNTED OPTION

FOR RADIANT SKIN INSIDE & OUTSIDE

BOOSTS MENTAL & PHYSICAL GROWTH

REVERSE OSMOSIS WATER PURIFICATION SYSTEM

OPTIMAL AND HEALTHY PH WATER CONTROLLED

MAINTAIN ENERGY LEVELS TO BOOST YOUR ACTIVITY EFFICIENT

INPUT POWER SUPPLY: 220V

ULTRA VOILENT TECHNOLOGY FROM USA TO REMOVE GERMS
AND VIRUSES

ALKALINE RO FILTER HELPS IN INCREASE PH LEVEL TO BUILD
YOUR IMMUNE SYSTEM STRONG

EASY TO REPLACE PRE-FILTER CARTRIDGE, PP SPUN

AVAILABLE IN : GALSS - WHITE VARIANT

SMPS DC POWER SUPPLY 24 VOLTS

RO BOSSTER PUMP 24 VOLTS 80 GDP

12-STAGE FILTRATION PROCESS: EXTERNAL HOUSING, PP
SPUN PRE-FILTER CARTRIDGE, ACTIVATED CARBON, RO

WHY FLAVIA ALKASURE RO?

Introducing the Flavia Alkasure RO Water Purifier, your ultimate solution for pure and healthy drinking water. This state-of-the-art appliance combines the power of Antioxidant Alkaline, RO (Reverse Osmosis), and Mineral technologies to deliver water that not only quenches your thirst but also nourishes your body. With its 15 liters per hour purification capability, you can enjoy a continuous supply of clean and safe water, ensuring that your family stays hydrated and healthy.

What sets the Flavia Alkasure RO Water Purifier apart is its 12-liter water capacity, which means you won't have to worry about refilling the tank constantly. Whether you need water for drinking, cooking, or simply staying refreshed, this purifier has got you covered. The Antioxidant Alkaline feature helps to neutralize harmful free radicals in the water, while RO technology effectively removes impurities, and the added minerals ensure that the water is not just pure but also rich in essential elements. Say goodbye to concerns about water quality with this innovative and reliable water purifier.

Investing in the Flavia Alkasure RO Water Purifier is a step towards a healthier lifestyle. With its exceptional purification capabilities and large water tank, it's a convenient and efficient addition to any household. Enjoy the peace of mind that comes with knowing your family is drinking the best quality water available, and experience the refreshing taste of pure water enriched with essential minerals. Make the Flavia Alkasure RO Water Purifier a part of your daily life and discover the joy of clean, safe, and nourishing hydration.

WHY FLAVIA GALAXY RO?

Introducing the Flavia GALAXY RO Water Purifier, a cutting-edge solution that combines advanced filtration technologies to provide you with the purest, healthiest drinking water. With its Copper Alkaline + RO + UV purification system, this water purifier goes above and beyond to ensure your water is not only safe but also enriched with essential minerals. This three-pronged approach effectively removes impurities, microorganisms, and harmful contaminants, while the copper alkaline technology infuses your water with the goodness of copper, known for its numerous health benefits.

One of the standout features of the Flavia GALAXY RO Water Purifier is its impressive purification capability, delivering a remarkable 15 liters of purified water per hour. This is a game-changer for homes, offices, and commercial spaces where access to clean water is essential. Additionally, the purifier boasts a generous 12-liter water storage capacity, ensuring you have a continuous supply of purified water, even during peak usage times. Say goodbye to the inconvenience of frequent refills and enjoy the peace of mind that comes with having clean water readily available.

Investing in the Flavia GALAXY RO Water Purifier is not just about convenience; it's a commitment to your health and well-being. With its high-quality filtration processes and copper enrichment, this purifier stands as a testament to Flavia's dedication to providing you with top-tier water purification solutions. Enjoy the refreshing taste and purity of water that only the Flavia GALAXY can deliver.

WHY FLAVIA COPPOR RO?

Introducing the Flavia Copper RO Water Purifier, a groundbreaking addition to your household for top-tier water purification. This state-of-the-art appliance combines the power of Copper Alkaline, Reverse Osmosis (RO), and Ultraviolet (UV) technologies to ensure that you and your family have access to the purest, healthiest drinking water. With a remarkable purification capacity of 15 liters per hour, it can effortlessly meet the daily water needs of your entire family.

One of the standout features of the Flavia Copper RO Water Purifier is its generous water storage capacity, offering 12 liters of pristine water ready at your disposal. This ensures you always have a sufficient supply of purified water, even during peak consumption times. The integration of Copper Alkaline technology adds an extra layer of health benefits, as it not only purifies the water but also infuses it with essential minerals, enhancing its taste and promoting overall well-being. With the combination of RO and UV purification, you can have peace of mind, knowing that harmful contaminants and pathogens are effectively removed, leaving you with clean and refreshing water every time.

In a world where water quality is becoming increasingly important, the Flavia Copper RO Water Purifier stands out as a reliable and advanced solution for your household. It's more than just a water purifier; it's an investment in the health and safety of your loved ones. Experience the convenience, purity, and innovation of Flavia today, and enjoy the goodness of Copper Alkaline, RO, and UV technology in every drop.

WHY BIO SHINE GRAVITY FILTER?

Introducing the Flavia Bio Shine Gravity Water Purifier, the epitome of innovation in water purification technology. This cutting-edge device incorporates advanced UF (Ultrafiltration) technology, ensuring that your drinking water is as pure and safe as can be. The Bio Shine is designed to meet the demands of households of all sizes, providing clean and healthy drinking water for your family.

What truly sets the Flavia Bio Shine apart is its generous water storage capacity of 20 liters. This means you won't have to worry about running out of purified water, even during peak usage times. Its user-friendly design ensures effortless operation, making it a perfect addition to any modern home. Whether you're concerned about the quality of your tap water or just want to elevate your family's health, the Flavia Bio Shine Gravity Water Purifier is your answer to crystal-clear, refreshing water.

Experience the confidence of knowing that your family's well-being is safeguarded with the Flavia Bio Shine. Its efficient UF technology, impressive purification capacity, and ample water storage make it an invaluable addition to your household. Say goodbye to impurities and welcome pure, delicious water into your life with the Flavia Bio Shine Gravity Water Purifier.

TECHNOLOGY**

**COMMERCIAL AND INDUSTRIAL
WATER PURIFIER PLANT WITH
REVERSE OSMOSIS
STARTING FROM 25 LPH - 10,000 LPH.**

INTRODUCING SUPRIYA WATER INDUSTRIAL SERIES

**SUPRIYA WATER
TECHNOLOGY**

WORKING STRUCTURE OF INDUSTRIAL RO

Flow of Water:

It Draws raw water (this may be seawater, fresh water or whatever mixture of the two boat is floating in) into the engine's open or raw-water cooling circuit using a rubber impeller.

Water Softener:

A Water Softener is designed to remove the hardness (a combination of calcium & Magnesium salts) from the water by a process known as ion exchange. The media, called resin, in the water softener, is charged with sodium ions from brine contained in the brine tank, during the regeneration process

Pre Filter:

The pre-filtration stage separates out sand, silt and other residual particles from water. The pre-filtration step is important to keep the RO Membrane safe from damage. Not changing pre-filters might damage RO membrane and the water purification process may also be affected.

Spun Filter:

Spun Filters are ideal pre-filters and polishing filters where there is a fairly wide contaminant particle size distribution.

High Pressure Pump:

A high-pressure pump is designed to move water with much higher levels of pressure.

Solenoid Valve:

A solenoid valve uses a plunger to open and close an orifice, which either prevents or allows the flow of a medium. This Plunger Opens and closes by moving up and Down by the use of an electromagnetic field generated by a magnet

Membranes:

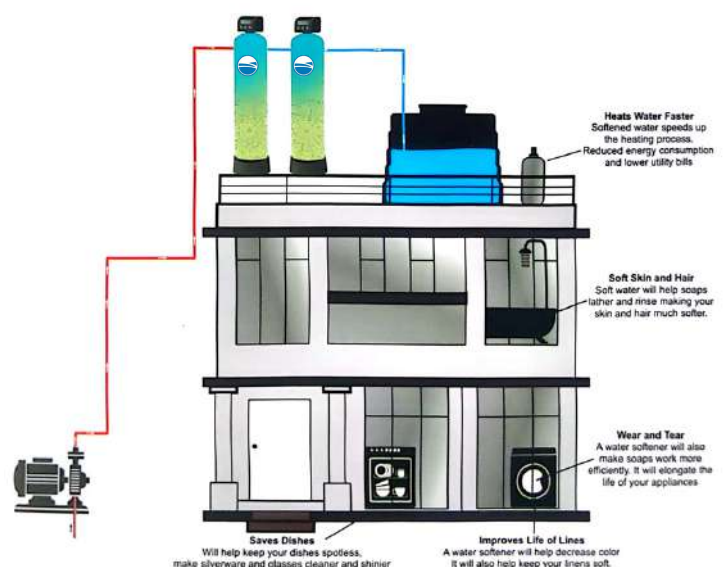

Membranes are commonly used a filtration method to remove many types of dissolved solid (large molecules and ions) from solutions by applying pressure to the solution when it is on one side of selective membrane.

Mono-Block Pump:

The centrifugal mono-block pumps are mainly recommended for freshwater as well as fluids which are not chemically violent toward the components of the pump.

Waste Water Management:

Unlike traditional water purification systems, Supriya Water Technology Saves and reuses every last bit of water, with no additional equipment required.
