About Company

Welcome to Supriya Water Technology, a pioneering leader in delivering unrivaled solutions for all your water-related needs. With a steadfast commitment to excellence, we offer a comprehensive range of services that encompass every aspect of water treatment. Our expertise extends to Annual Maintenance Contracts (AMC) for water treatment systems, ensuring the consistent performance and longevity of your equipment. We specialize in top-of-the-line RO water purifiers, setting new standards for clean and safe drinking water. Our proficiency also extends to crafting captivating water fountains that elevate aesthetics while maintaining water purity. Moreover, we excel in the meticulous installation of both domestic and industrial RO water plants. Additionally, our advanced water tank cleaning system ensures the highest hygiene standards for stored water. When you partner with Supriya Water Technology, you're not just accessing services – you're accessing the pinnacle of water expertise.

Sanjiv K. Chaudhary

Chairman of Company

Welcome Message

Welcome to Supriya Water Technology, your gateway to comprehensive water solutions designed to elevate quality of life. With a legacy spanning 12 years, we take pride in being a beacon of excellence in the water treatment industry. At Supriya Water Technology, we specialize in crafting innovative Digital Water Fountains with lighting and non lighting, Musical & Non-Musical effect, Installation & Service of water treatment Plant, RO purifiers, Introducing 1st time in Nepal 6th Stage of Tank Cleaning Service by Supriya Water Technology, etc., tailored to meet the unique needs of our diverse client. As you embark on this journey through our company profile, you'll discover our unwavering commitment to purity, sustainability, and cutting-edge technology. Thank you for considering Supriya Water Technology – where every drop matters, and every solution reflects our dedication to a healthier world.

Vision & Mission

Vision

At Supriya Water Technology, we envision a world where access to clean and safe water is not a luxury but a fundamental right. Guided by innovation, sustainability, and unwavering integrity, our vision is to lead the water treatment industry by providing revolutionary solutions that transcend boundaries. We aspire to be the driving force behind a global transformation in water quality, setting new standards of excellence through advanced technology, relentless research, and a resolute commitment to the well-being of communities and the environment. With each endeavor, we strive to shape a future where every individual enjoys the benefits of pure, refreshing water, ensuring a healthier and more vibrant world for generations to come.

Mission

At Supriya Water Technology, our mission is to revolutionize water treatment through innovation, expertise, and a profound sense of responsibility. We are committed to delivering cutting-edge solutions that address the diverse challenges of water quality, scarcity, and sustainability. By consistently exceeding industry standards, and embracing emerging technologies, we aim to empower individuals, households, and industries with access to pure, safe, and reliable water. Our unwavering dedication to research, development, and community engagement fuels our journey towards a world where water-related concerns are not just solved, but transformed into opportunities for growth and well-being.

Projects & Testimonials

EMBASSY OF INDIA KATHMANDU

Supriya Water Technology has truly impressed us with their remarkable work in making water clean and safe. Their clever solutions are helping many people get better access to healthy water inside embassy. We're really pleased with their efforts and wish them the best going forward.

ALOFT HOTEL KATHMANDU

Supriya Water Technology's water treatment services are truly exceptional. Their commitment to using advanced technologies and environmentally friendly approaches is commendable. With their reliable solutions, they have undoubtedly set a new standard in the industry. We are highly impressed by their dedication to providing the best AMC water treatment services, ensuring healthier lives.

AANAND HOTEL KATHMANDU

Supriya Water Technology has truly elevated our guest experience at Hotel Aanand with their exceptional water services. Their state-of-the-art solutions have consistently delivered pristine water quality, meeting our highest hospitality standards. Their reliable and efficient support reflects their commitment to excellence. We are delighted to have them as our water service provider, contributing to our guests' well-being and satisfaction.

NEPAL ELECTRICITY AUTHORITY

Supriya Water Technology has significantly enhanced our operations at Nepal Electricity Authority by delivering top-notch water services. Their advanced solutions have consistently provided us with clean and reliable water, crucial for our daily tasks. Their commitment to excellence and efficiency is evident in their outstanding support. We greatly value their service, which contributes to the smooth functioning of our organization.

PATANJALI YOGPEETH KATHMANDU

Supriya Water Technology has been a great help to Patanjali Yogpeeth by giving us excellent water services. Their smart solutions always make sure we have clean and safe water for everything we do here. They work really hard to do a good job, and we're happy to have them as our water service partner.

BATAS ORGANIZATION KATHMANDU

Supriya Water Technology has been fantastic for our Batas Organization, providing us with top-quality water services. Their solutions ensure that we always have clean and safe water available. They're really good at what they do, and we're grateful to have them as our water service provider company.

CHHAYA CENTER KATHMANDU

Chhaya Center is pleased to acknowledge the excellent water services provided by Supriya Water Technology. Their effective solutions ensure a steady availability of clean and safe water, which is essential for our center's activities. Their commitment and proficiency are highly valued, and we're fortunate to have Supriya Water Technology as our dependable water service provider.

NORVIC HOSPITAL KATHMANDU

The water services offered by Supriya Water Technology have been indispensable for Norvic Hospital. Their innovative solutions guarantee a steady flow of clean and safe water, a crucial factor for our hospital's everyday functioning. Their commitment and proficiency are highly valued.

VAYODHA HOSPITAL KATHMANDU

Vayodha Hospital is pleased to express our gratitude for the exceptional water services delivered by Supriya Water Technology. Their innovative solutions guarantee a continuous supply of clean and safe water, a fundamental aspect of our hospital's functioning. Their dedication and expertise are truly commendable, and we are fortunate to have Supriya Water Technology as our esteemed water service provider.

KENDRIYA VIDYALAYA KATHMANDU

Kendriya Vidyalaya greatly appreciates the reliable water services provided by Supriya Water Technology. Their efficient solutions ensure a consistent supply of clean and safe water, essential for our school's daily operations. Their dedication and expertise are truly commendable.

ALKA HOSPITAL KATHMANDU

Alka Hospital extends its sincere gratitude to Supriya Water Technology for their exceptional water services. Their efficient solutions ensure a consistent supply of clean and safe water, crucial for our hospital's operations. Their commitment and expertise are highly valued.

HOTEL MECHI CROWN JHAPA

Hotel Mechi Crown extends its sincere appreciation for the outstanding water services provided by Supriya Water Technology. Their effective solutions ensure a consistent supply of clean and safe water, a vital component of our hotel's services. Their dedication and expertise are highly valued.

SIDDHARTHA HOTEL NEPALGUNJ

Sidhartha Hotel wishes to express its deep gratitude for the exceptional water services provided by Supriya Water Technology. Their advanced solutions ensure a reliable supply of clean and safe water, which is crucial for our hotel's operations. Their commitment and expertise are truly commendable, and we are proud to have Supriya Water Technology as our esteemed water service provider.

MANIGRAM BISHRAM BATIKA BUTWAL

Manigram Bishram Batika heartedly appreciates the water services provided by Supriya Water Technology. Their expert solutions ensure a continuous supply of clean and safe water, a crucial aspect of our Resort's environment. Their dedication and proficiency are highly valued.

OM SAI HOSPITAL JHAPA

Om Sai Hospital extends its heartfelt appreciation for the outstanding water services provided by Supriya Water Technology. Their innovative solutions guarantee a consistent supply of clean and safe water, a critical element for our hospital's operations. Their dedication and expertise are highly valued, and we are privileged to have Supriya Water Technology as our trusted water service provider.

BRITISH EMBASSY KATHMANDU

The British Embassy extends its profound appreciation for the exceptional water services orchestrated by Supriya Water Technology. Their ingenious solutions guarantee an unceasing flow of pristine and secure water, an indispensable facet of our embassy's operations. Their resolute commitment and expertise are held in the highest regard.

KATHMANDU MEDICAL COLLEGE KATHMANDU

Kathmandu Medical College wholeheartedly acknowledges the valuable water services delivered by Supriya Water Technology. Their adept solutions ensure an uninterrupted supply of pure and safe water, an indispensable component of our medical college's functioning. Their unwavering commitment and expertise are highly esteemed.

D.A.V SCHOOL & COLLEGE KATHMANDU

DAV School and College wholeheartedly applauds the exemplary water tank cleaning services offered by Supriya Water Technology. Their meticulous solutions ensure the maintenance of hygienic and uncontaminated water storage, a pivotal factor for our educational institution's welfare.

QFX CINEMAS

QFX commends the outstanding WTP services by Supriya Water Technology. Their expert solutions guarantee the seamless operation and maintenance of our water treatment systems, a critical component of our operations. Their unwavering commitment and proficiency are highly esteemed, and we proudly align with Supriya Water Technology as our trusted WTP service provider.

CG LANDMARK CHITWAN

CG Landmark enthusiastically acknowledges the exceptional supply and installation of RO plant by Supriya Water Technology. Their solutions ensure the seamless integration and functioning of our RO systems. Their unwavering dedication and expertise are held in high esteem.

Our Service

Domestic/Industrial RO Water Plant

Our installation of domestic and industrial RO water plants combines expertise and precision. We assess project needs, customize designs, and ensure quality components for optimal performance. Rigorous testing guarantees purity and reliability, empowering clients with efficient, lasting solutions. Experience seamless integration and superior water treatment with us.

Water Fountains

Experience innovation at its finest! Our diverse water fountains cater to your preferences, offering segments like musical/non-musical and lighting/non-lighting. Immerse yourself in a realm of choices, where each fountain tells a unique story. From soothing melodies to captivating designs, find a source of refreshment that goes beyond quenching your thirst.

Air Conditioners

Introducing comfort redefined! Our range of air conditioners offers tailored solutions for your cooling needs. Explore various segments including energy-efficient and powerful cooling options, as well as models with smart technology and classic controls.

Water Tank Cleaning

Experience the peace of mind that comes from knowing your water is not just clean, but clinically sanitized, ensuring the well-being of your household with every use.

AMC For Water Treatment Plant / STP and ETP

Our installation of domestic and industrial RO water plants combines expertise and precision. We assess project needs, customize designs, and ensure quality components for optimal performance. Rigorous testing guarantees purity and reliability, empowering clients with efficient, lasting solutions. Experience seamless integration and superior water treatment with us.

TANK CLEANING PROCEDURE

SUPRIYA WATER
TECHNOLOGY

Stage 01 – Mechanized Dewatering:

Mechanized dewatering is carried out to extract residual water below the foot-valve level, using specially designed High Capacity Submersible Dewatering Pumps equipped with the necessary outlet and discharge capabilities to eliminate solid particles that gather on the tank floor.

Stage 02 – De-Silting with special sludge removal pump:

The thick muddy sludge left on the tank floor post-de-watering is eliminated using a specially crafted, high-pressure sludge pump imported for this purpose. The sludge is then disposed of safely away from the water tank through outlet pipes. This sludge removal pump can operate "dry" for any duration and efficiently eliminates even the thickest sludge, with particle sizes up to 25mm, effortlessly without manual intervention.

Stage 03 – High pressure cleaning of ceiling, walls and floor:

All internal surfaces, including the ceiling, entire wall area, and floor, undergo meticulous cleaning using high-pressure rotary jets and specialized flat jet lances. These High Pressure cleaners, renowned as the finest and safest professional cleaning machines globally, are imported from Germany. Emphasis is placed on meticulously cleaning the corners and edges of the ceiling and walls using high-pressure water jets, as most hazardous bacteria and contaminants tend to thrive in these inaccessible regions, posing a risk to drinking water quality. This specialized high-pressure cleaning also effectively eliminates any calcination and layers of stubborn dirt adhering to the tank walls, which represent another significant source of drinking water contamination.

TANK CLEANING PROCEDURE

SUPRIYA WATER
TECHNOLOGY

Stage 04 – Vacuum Cleaning the entire floor:

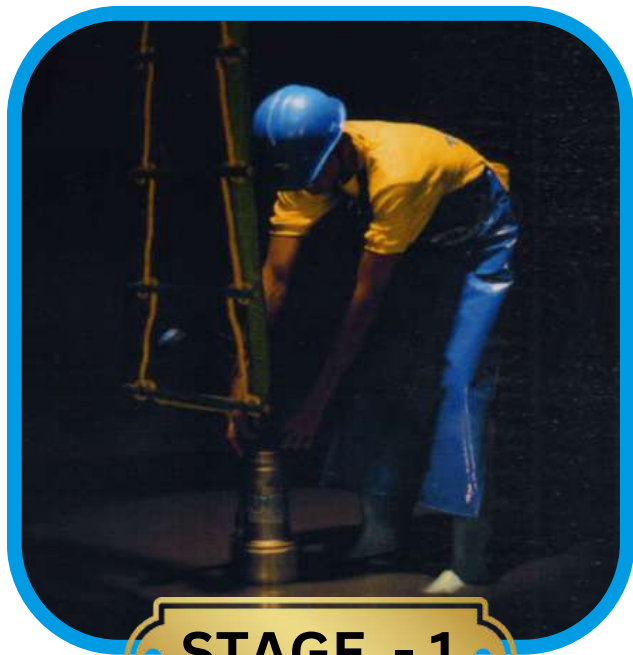

The specialized high-pressure sludge pump is utilized once more to extract the accumulated dirt and sludge following the high-pressure cleaning. Subsequently, the entire floor is thoroughly dried and cleaned using the special industrial vacuum cleaner. This process ensures that the tank floor and all internal surfaces are completely free of specks.

Stage 05 – Sterilising & Disinfection by our Special Tanclean Anti-bacterial agent:

This is the most important part of the TANK CLEAN Process. Our special TANK CLEAN Anti-Bacterial Agent is sprayed to on all the surfaces thoroughly to eliminate any kind of harmful bacteria, pathogens, viruses that cause water borne diseases. The TANCLEAN Anti-Bacterial Agent is totally safe, fully Bio-degradable, Eco-friendly and absolutely effective having been certified by various Government and Private Authorised authorities for its safety and efficacy for special purpose of cleaning and dis-infection of the drinking water tanks.

Stage 06 – UV Radiation to eliminate suspended & floating bacteria:

This is also another unique feature designed and developed by SUPRIYA WATER TECHNOLOGY for disinfection of the internal space in the tank. The Treatment of the inside space in the tank is done by exposing Ultra-Violet radiation via imported heavy duty UV radiator. The radiator has been specially designed and developed by TANCLEAN to ensure 360° coverage for final sterilization of drinking water tanks for elimination of floating and suspended bacteria.

**SUPRIYA WATER
TECHNOLOGY**

WORKING STRUCTURE OF INDUSTRIAL RO

Flow of Water:

It Draws raw water (this may be seawater, fresh water or whatever mixture of the two boat is floating in) into the engine's open or raw-water cooling circuit using a rubber impeller.

Water Softener:

A Water Softener is designed to remove the hardness (a combination of calcium & Magnesium salts) from the water by a process known as ion exchange. The media, called resin, in the water softener, is charged with sodium ions from brine contained in the brine tank, during the regeneration process

Pre Filter:

The pre-filtration stage separates out sand, silt and other residual particles from water. The pre-filtration step is important to keep the RO Membrane safe from damage. Not changing pre-filters might damage RO membrane and the water purification process may also be affected.

Spun Filter:

Spun Filters are ideal pre-filters and polishing filters where there is a fairly wide contaminant particle size distribution.

High Pressure Pump:

A high-pressure pump is designed to move water with much higher levels of pressure.

Solenoid Valve:

A solenoid valve uses a plunger to open and close an orifice, which either prevents or allows the flow of a medium. This Plunger Opens and closes by moving up and Down by the use of an electromagnetic field generated by a magnet

Membranes:

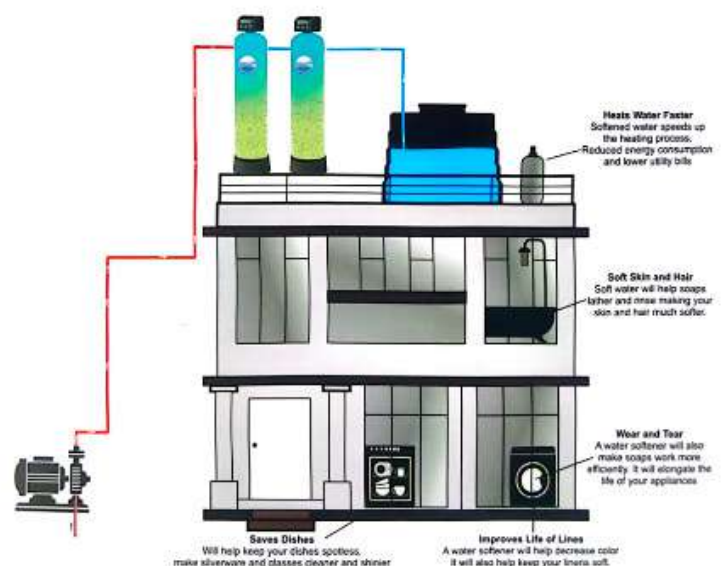

Membranes are commonly used a filtration method to remove many types of dissolved solid (large molecules and ions) from solutions by applying pressure to the solution when it is on one side of selective membrane.

Mono-Block Pump:

The centrifugal mono-block pumps are mainly recommended for freshwater as well as fluids which are not chemically violent toward the components of the pump.

Waste Water Management:

Unlike traditional water purification systems, Supriya Water Technology Saves and reuses every last bit of water, with no additional equipment required.

How We Work

1

At Supriya Water Technology, our approach is built on a foundation of expertise, innovation, and customer-centricity. We begin by thoroughly understanding the unique needs of each client, whether it's for water treatment solutions, RO water purifiers, water fountains, or industrial RO water plant installations. Our team of seasoned professionals collaborates closely with clients to design tailored strategies that address challenges effectively and efficiently.

2

We then employ state-of-the-art technology and industry best practices to execute these strategies, ensuring that every project is characterized by precision and excellence. Our commitment to quality doesn't stop at execution; we provide thorough support and guidance at every step, from installation and implementation to ongoing maintenance and support through our AMC services. Through this holistic approach, we ensure that our clients not only receive exceptional products and services but also gain a comprehensive understanding of the solutions implemented.

3

Ultimately, our success lies in the success of our clients. By working closely with them, delivering top-notch solutions, and consistently exceeding expectations, we forge lasting partnerships that reflect our dedication to superior water treatment, innovative technology, and a sustainable future.
